FOREWORD

Due to continuous research and development, some procedures and parts may be changed, Periodic revisions may be made to this publication.

The satisfactory ordering and receiving of parts are dependent largely upon the proper use of available information. To avoid errors in ordering the following procedure should be followed.

- 1) Furnish the correct part number, description and quantity required.*
- 2) Intimate the equipment serial number.*

The following few codifications have been introduced for better understanding and usage, especially with regard to serviceability and replacement of parts.

NAME OF PART : *Part name with prefixes (.),(..),(...) and so on indicate level of assembly.*

QTY : *'Qty' indicates the quantity of a part required per equipment. In case of a component part of an assembly, however, it indicates the quantity of the part required per assembly.*

***** : *Part is not supplied as an independent part, but the assembly containing the part.*

: *Item is shown to furnish further details and the same is for reference only. Hence the 'QTY' should not be reckoned with.*

\$: *Item is shown for shipping purpose only. These items are to be removed while assembling.*

Note : *1) For BS6D125 Engine details refer separate parts catalogue supplied along with this part catalogue.*

2) For details of Kit items K1, K2, K3 etc., indicated in the remarks column, refer the chapter "Seal Kit".
