The diagram illustrates a cable management setup. A grey cable is routed along a white rail. A yellow cable tie, labeled 'A', is used to secure the cable to the rail. A metal bracket, labeled 'B', is mounted on the rail and holds the cable in place. The bracket has several screws and a small circular component. The cable is bundled together with other cables, and the entire assembly is shown in a perspective view.

This exploded view diagram illustrates the assembly of a yellow metal cage. The main components and their assembly sequence are as follows:

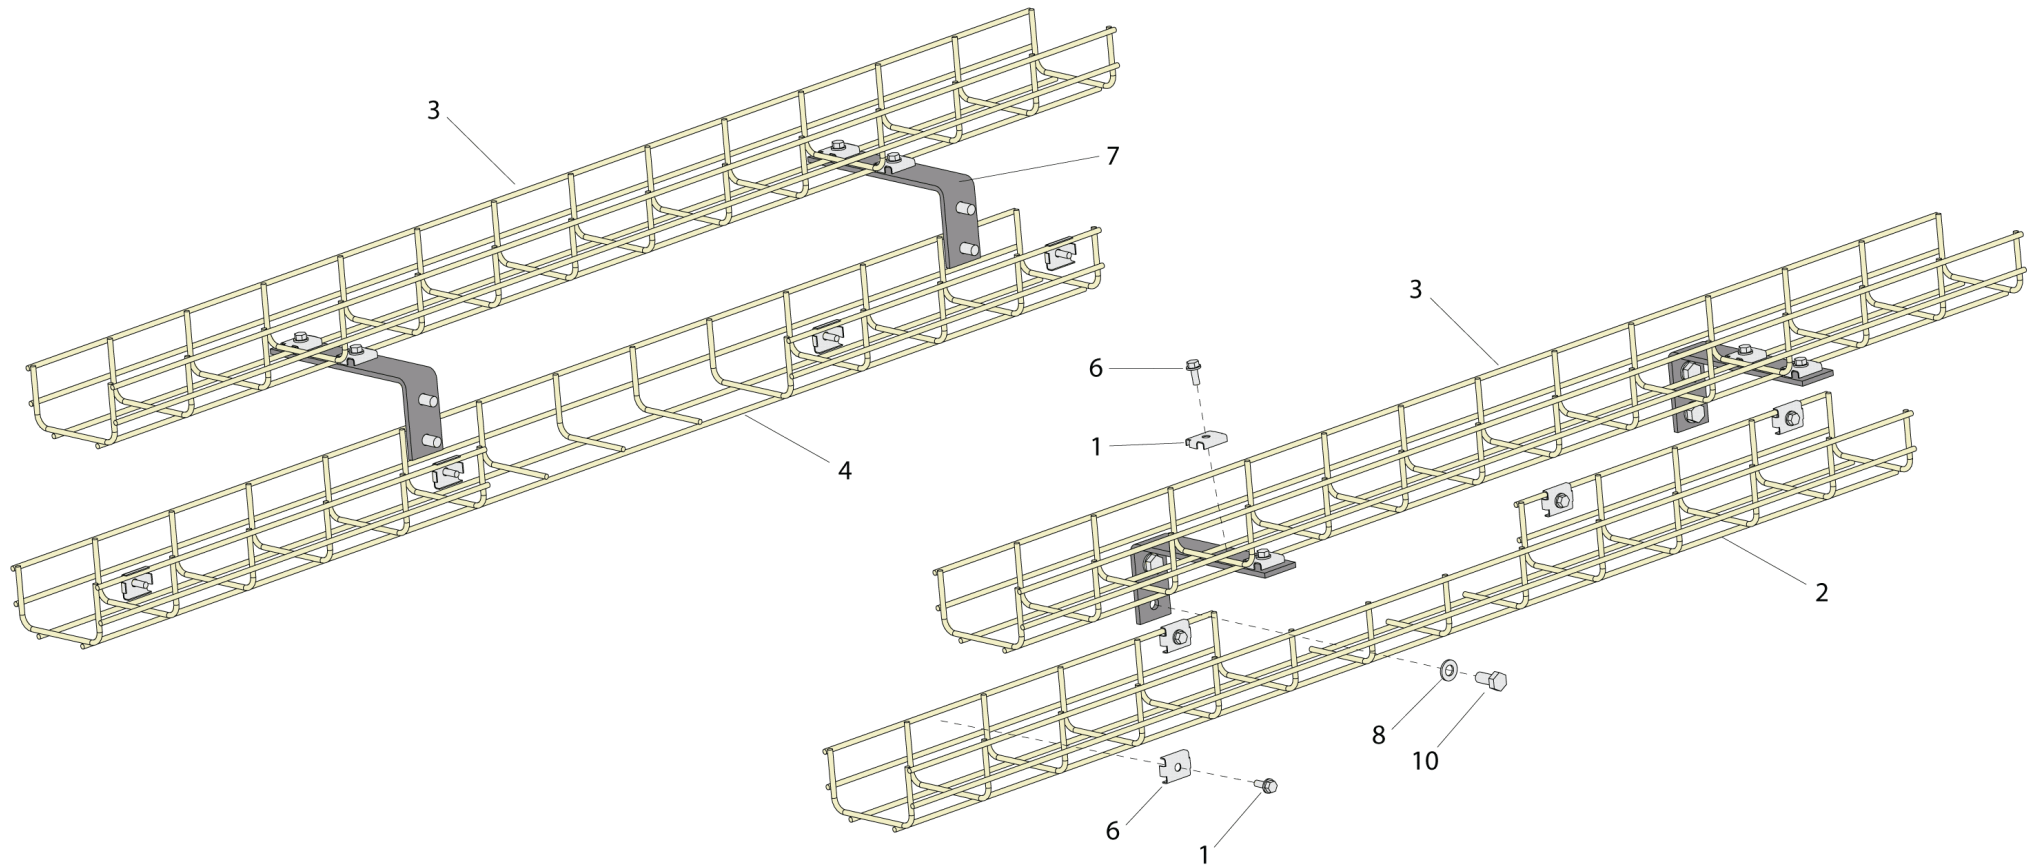

- Part 1:** The primary yellow metal frame with a handle cutout.
- Part 2:** A long, dark grey L-shaped reinforcement bar that fits into the frame.
- Part 3:** A small green rectangular plate that fits into a slot on the frame.
- Part 4:** A small green rectangular plate that fits into a slot on the frame.
- Part 5:** A small yellow rectangular plate that fits into a slot on the frame.
- Part 6:** A circular grey disc that fits into a hole on the frame.
- Part 7:** A small grey circular washer or spacer.
- Part 8:** A dark grey rectangular frame or handle component.
- Part 9:** A long, dark grey metal bar with a U-shaped cross-section.
- Part 10:** A long, dark grey metal bar with a U-shaped cross-section.
- Part 11:** A long, dark grey metal bar with a U-shaped cross-section.
- Part 12:** A small grey circular washer or spacer.
- Part 13:** A dark grey rectangular plate that fits into a slot on the frame.
- Part 14:** A red plastic or metal clip that fits into a slot on the frame.

Dashed lines indicate the precise alignment and assembly path for each component, showing how they interlock to form the complete cage structure.
