INSTRUCTIONS FOR HOW TO USE THIS CATALOGUES

1. Illustrations in this catalogue are not photographic representation of the part in every detail; they are only meant for part identification for correct ordering. Whenever "Fig." in column 1 is in parenthesis, it means that this part does not exactly look like the illustration – sign in column "1" Fig. No. 'means that there is no illustation".

2. Part Description is meant for understanding the location/function/engineering nomenclature, it is often abbreviated due to lack of space THEREFORE THE SANCTITY OF THE ORDER IS BY PART NUMBER ONLY.

3. "Optional" appearing in column "Remarks" means that this part can be fitted optionally with other parts, all of which bear this remarks and are bracketed together.

4. The designations "Left" and "Right" as well "front" and "rear" are reckoned sitting in the driver's seat. Similarly "first" and "second" (e.g. cross member on chassis frame) are counted from the radiator side towards the rear end.

5. Blank in column "No. of Spare Parts" means although the description is given the part number was not available at the time of publication of this catalogue. They are intimated subsequently through modification note after which you should enter it in the appropriate column.

6. For any clarification on this catalogue please write to :

PREFACE

The illustrative Spare Part List have been prepared for the purpose of identifying component parts and assembly of parts. All concerned will use the designation given in the list when demanding the parts from Ordnance depot or when referring in correspondence to any parts of equipment.

Catalogue numbers quoted in this list will supercede any other catalogue number that may have been allotted previously. When demanding spare parts the following particulars must be quoted.

a. Cos Section
b. Part Number
c. Designation of Parts
d. Designation of equipment for which parts are required

Note: i. Abbreviation appearing in the list are generally in accordance with those accepted and recognised by Indian Standards Institute.
ii. Amendment to this list will be notified in supplement, unit indent through normal channels for copies as required. It is essential that the list should be carefully amended and details of amendments entered in the amendment sheet.

Comments and suggestions:

IDENTIFICATION

Every vehicle has been fitted with the identification Plate as per details given below:

M/s Tata Motors

A/T No. .....

BA No. .....

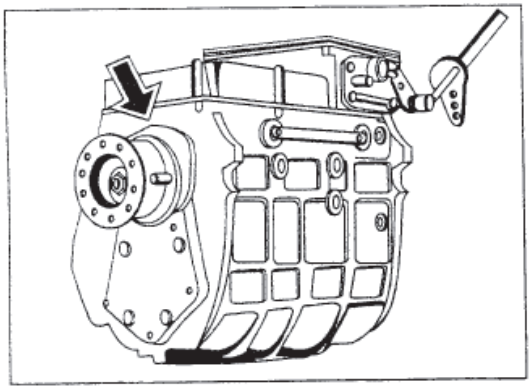
Chassis Serial No. .....

Year of Manufacture .....

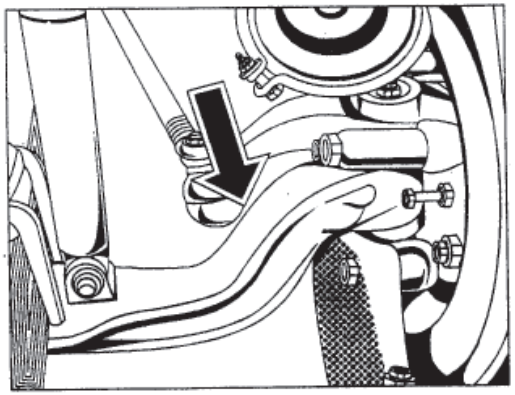
Deatils of Cab / Body .....

UNIT NUMBER PLATES

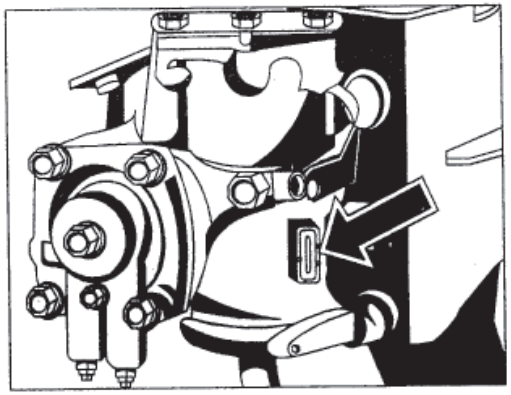
GEAR BOX



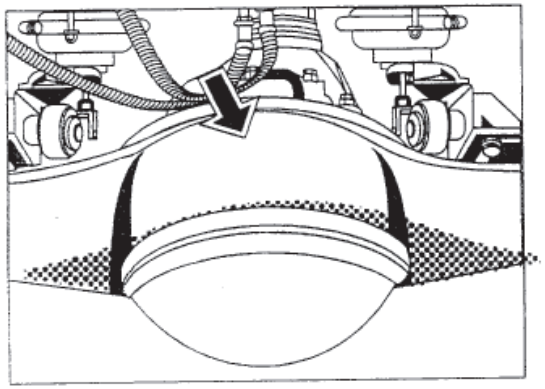
FRONT AXLE



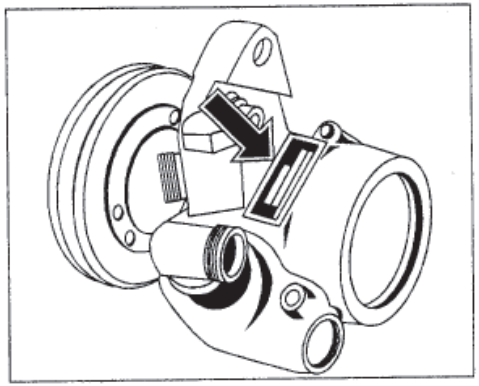
STEERING GEAR BOX



REAR AXLE



STEERING PUMP



ENGINE

SPV	System Protection Valve

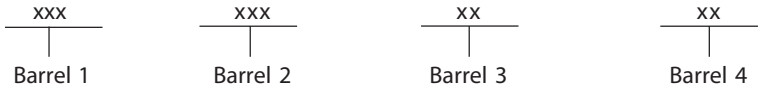
INTRODUCTION

The list covers details of parts of TATA Chassis Model
Different part number system used in TATA Vehicles :
The numbers used in this catalogue are broadly divided into 3 types as given below :

a. 10 digit
b. 12 digit TML Part Numbers
c. 11 digit

a. 10 digit TML Part Numbers :

The numbering is done in 4 barrels each consisting of 3, 3, 2 and 2 digits respectively.



Barrel 1 : This indicates the model number for which the part is first made. Keeping Standardization in view of the same part can be used on other models and still retain the same numbers.

Barrel 2 : The first 2 digits of barrel indicates the group number and the 3rd digit indicates the sub group number of the particular group. All the vehicle components have been classified under different groups from 01 to 99. These group numbers are same as those mentioned in the index to spare parts manual. For example,
Group 25 indicates 'Clutch' Group 26 indicates 'Main Transmission'.

Barrel 3 : This refers to the serial number of the part designated by barrel 4 stands for the 1st serial number and can go upto 99 for the particular part designation.

Barrel 4 : Each of the sub groups indicated in barrel 2 have been further divided into different 'part designation'. For example, Part designation 62 of group 26 stands for spacer washers.

b. 12 digit TML Part Numbers :

The numbering is done in 4 barrels each consisting of 4, 4, 2 and 2 digits respectively.

Barrel 1 : This indicates the Project / Major aggregates like engine or gear box for which the part is first made. Keeping Standardization of parts in view, a part can be used on other models and still retain the same number.

The first barrel numbers for some popular vehicles and aggregates are given below :

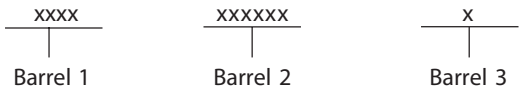
2506 - GBC 30 Gear Box (Constantmesh)
2505 - GBS 40 Gear Box (Synchromesh)
2523 - DI Engine 6 x 92 x 120
2574 - 1210 Model
2573 - 1210 Model

Barrel 2 : First 2 digits of barrel 2 indicate the group number and the 3rd and 4th indicate the sub group number of the particular group. All the vehicle components have been classified under different groups ranging from 01 to 99. These group numbers also common with TATA part Numbering system.

Barrel 3 : This barrel indicates the part designation. Part bearing the same general designation would have the same number in this barrel e.g. 83 in barrel, 3 will be 'Shims' (However, 00 to 29 in this barrel are allotted for other requirements.)

Barrel 4 : This barrel indicate the serial number of the part designated by barrel 3. The type, group, sub group and the part description remaining the same. It is the serial number which differentiate between similar assembly / items having differences in materials, dimentions, tolerances.

b. 11 digit TML Part Numbers :



All standard items which are generally bought out are given 11 digit code numbers. The numbering is done in 3 in barrels each consisting of 4, 6 & 1 respectively.

Barrel 1 : This indicates the basic items such as Hex Bolt, Spring Washer or bearing. The first two digits significance for some of the commonly used items are as follow :

11xx - Bolts, Screw, Studs
12xx - Nuts & Washers
13xx - Pins, Rivets
14xx - Clips, Circlips
15xx - Bearings
16xx - Pipe & House Fittings
17xx - Machine Fittings & Accessories
62xx - Electricals Items

Barrel 2 : This gives the specification and size of the item identified by barrel.

Barrel 3 : This is check digit used for verifying the corrections of first 10 digits.
